# WVCHIP Enrollment Report

FEBRUARY 2026

The above map shows the most recent 2023 county level data provided by the U.S. Census Bureau Small Area Health Insurance Estimates (SAHIE) for children under 19 years. While the statewide average for children under 19 is now about 3.3%, the SAHIE data reflects more accurately the variation from county to county depending on the availability of employer-sponsored insurance and should be a more accurate way to target outreach than in previous years.
